

Junior Environmental Technician

Fort St. John, BC

About Us

Recon Environmental Ltd. is a growing environmental consulting firm. We are committed to delivering comprehensive environmental consulting services tailored to the unique needs of our clients across a wide range of industries. Our team brings over 100 years of combined experience and is redefining environmental consulting through project management strategies that prioritize technical expertise, local knowledge, and collaboration. Focusing on Northern BC and Northern Alberta, our expertise spans Oil and Gas, Renewable Energy, Mining, Forestry, Agriculture, and Wildlife Conservation.

With a strong commitment to safety, integrity, and environmental stewardship, we are seeking a motivated Junior Environmental Technician to join our Fort St. John team.

Position Overview

We are seeking a Junior Environmental Technician to join our field team. This entry-level role is ideal for individuals with 0–5 years of relevant experience who are eager to develop hands-on, field-based skills while working alongside experienced environmental professionals in a supportive, safety-focused environment.

Key Responsibilities

- Support senior staff with the execution of field programs, including:
 - Construction environmental monitoring
 - Remediation and reclamation projects
 - First Nations and industry pre-engagement assessments
- Conduct site inspections to verify compliance with environmental regulations, permits, and mitigation measures
- Monitor construction and operational activities for environmental impacts
- Collect field data, photographs, and maintain accurate daily field notes
- Assist with environmental sampling for soil, water, wildlife, and vegetation programs
- Identify and report environmental concerns or non-compliance issues to senior staff
- Assist with the preparation of daily monitoring logs and summary reports
- Adhere to all company health, safety, and environmental policies
- Perform other field or office support duties as required

Qualifications

- **Diploma or Bachelor's degree** in Environmental Science, Biology, Environmental Engineering, or a related discipline
- **0-5 years** of relevant environmental work experience
- Knowledge of provincial and federal environmental regulations are considered an asset
- Strong observational and communication skills, attention to detail, and professionalism
- Ability to work independently and collaboratively in a team environment
- Willingness to work outdoors in varying weather conditions and terrain
- Experience in the BC oil & gas or northern resource sectors is considered an asset
- Basic computer skills, including Microsoft Office
- Experience with Fieldshare software is considered an asset
- Valid **Class 5 driver's license** and willingness to travel for fieldwork
- First Aid, H2S Alive, or other safety certifications are considered an asset

What We Offer

- **Competitive compensation** aligned with education and experience, plus **overtime** opportunities
- **Comprehensive benefits program**, including health, dental, and disability coverage, and paid professional association dues
- **Hybrid work environment**, consisting of fieldwork and work-from-home model with regional travel, as required
- **Company vehicle or mileage** provided
- Starting entitlement of **two (2) weeks' paid vacation**, with flexible scheduling and unpaid leave options available during slower operational periods
- **Professional development and opportunities for career advancement** including access to training, mentorship, and support for continuing education and certifications
- **Supportive and collaborative team culture**, with a strong emphasis on safety, quality, technical excellence, and knowledge sharing
- **Meaningful and rewarding work**, contributing to environmental protection and responsible resource development across Northern British Columbia and Alberta

How to Apply
